FREEDOM OF INFORMATION REQUEST

RF23-746

Request

1. Does your hospital have a software system capable of patient radiation dose recording and management in radiology? (Note: this could be a stand along product or be part of a PACS or other radiology platform solutions)

2. If so, is it a commercially available system or a system free of cost to use?

Response

We can confirm East Kent Hospitals University NHS Foundation Trust (EKHUFT) holds the information you have requested.

1. Currently we have the Radiology Information System (RIS) where radiation doses are recorded. We use Dosetrack in Nuclear Medicine to manage dose and waste.

2. Both of the above are paid for applications.

(DATE OF RESPONSE: 27 DECEMBER 2023)
